Experience

2016–2017 **Backend engineer**, *Trusted*, San Francisco, CA, Ruby.

- Adding and updating API calls to help scale the business and delight our users;
- Helping on various front, including fixing live production data and various issues;

2013–2015 **Full stack developer**, *Bespoke Post*, New York City, US, Ruby & Javascript.

I handled most of the technical tasks for two years in a NYC startup, while we tripled the number of employees and multiplied our revenue by 10x.

Some tasks I accomplished:

- Allowing products to be grouped as one product with complex rules;
- Creating a template language based on Liquid to be able to create any page dynamically;
- Having most pages and API calls fully cacheable, and other performance improvements;
- Migrated to a fully responsive and modifiable design, including redesigns;

2010–2013, **Freelancer**, *DoMa*, France.

2015–2016 Working with customers online and in France

- Online store in Ruby on Rails for a Portland-based coffee-related software company
- Development and design of printed guides, flyers and websites for shops;
- Scrapping of cooking recipes, shopping websites, and popular instagram users;

Education

2010–2013, **Computer science, Engineering**, *University of Technology of Troyes*, France.

2015–2017 Master engineering diploma: PHP, HTML, CSS, JavaScript, Java, C, Algorithms, etc.

2005–now **Programming**, *Self-Taught*, France.

I learned Python, C, C++, PHP, HTML, CSS, JavaScript and Ruby by myself. I'm still learning everyday, contributing to open-source projects and going to events.
